

TEST PLAN — SauceDemo Web Application

1. OBJECTIVE

Verify that the login, product listing, cart, and checkout features of saucedemo.com work correctly for both valid and invalid inputs.

2. SCOPE (what I WILL test)

- Login page (valid login, invalid login, locked-out user)
- Product listing page (sorting, product display)
- Cart (add item, remove item, cart count)
- Checkout (entering shipping info, order completion)

3. OUT OF SCOPE (what I will NOT test, and why)

- Actual payment processing — it's a demo site, payment isn't real
- Mobile app version — I'm only testing the website

4. TEST APPROACH

Manual functional and UI testing, done by hand in Chrome browser, comparing what the site actually does against what it should do.

5. ENVIRONMENT

Browser: Google Chrome (latest version)

OS: Windows 11

URL: <https://www.saucedemo.com>
